Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-3 and 5-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Azuma in view of Tulik, Farook, Ikeda, Milkovich, Barrett and the Japan patent 59-966. The references are applied as in last office action..

Applicant's arguments filed with the last response have been fully considered but they are not persuasive. See discussion in last office action on page 3 which provides response to similar arguments by applicant... In addition the following comments are made. On pages 3,, 4 applicant refers to the thickness range recited in the claims. However note that the cited references all show interposer thicknesses that fall well within that recited in claims 1, 11. While these are admittedly not to scale they each seem to be drawn so as to at least approximately represent actual cases that would be used in the prior art with interposers that are about equal to, down to ones that are about 10% of, substrate thickness. In addition the range recited in claims 1, 11 is very wide and involves a factor of 30 from end to end of the range and would appear to cover almost all interposers in actual use. In addition the selection of a Young's Modulus to use with an interposer of such wide range thickness is seen as only a selection of optimum parameters and not as an unobvious variation. For argument on page 5 selection of hole size is seen as a matter of obvious design and selection of optimum parameters and is not shown to interrelate with other recited features to produce any new result. For argument page 6 lines 18-20 both Japan patent and Barrett show holes in grid arrangement. For argument page 7 lines 1-3

terms " or equal to or larger than " are met by all five applied references that show holes in interposers.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
